

SAGE125 Canonical Research Report

Truth status: planned

ACTUAL EXECUTION: NO

Job job-owner-1 | Question Q001 | Run run-owner-1

Version: run-owner-1:v2

Generated: 2026-08-10T12:00:00+00:00

Scientific Question

How can a stable catalyst be designed for reaction X?

Domain: materials science

Hypotheses

- Catalyst A may improve stability under the declared protocol.

Methods

- Run the registered stability protocol with fixed seed 7.

Evidence

EV-OWNER-001: Owner supplied catalyst study

Catalyst A retained activity after the stability protocol.

Locator: page 7, Results

Verification: valid | Confidence: 0.91

<https://doi.org/10.1000/owner.1>

Reviewer Issues

[P1/resolved] critical_issue:owner001: No falsification threshold.

Resolution: Threshold 0.2 added by the owner revision service.

Human Feedback

N/A

Validation Gates

scientific-truth: passed (P1)

Execution

Availability: available

Status: planned

Execution ID: execution-owner-1

ACTUAL EXECUTION: NO

Warning: 实验尚未真实执行。

Multimodal Validation

mm-owner-1: chart; source=paper-figure-1; page=4; bbox=[10.0, 20.0, 200.0, 160.0]; units=mA; confidence=0.72; status=needs_review

Known Limitations

- 本报告为 planned 状态，不得作为真实实验结果引用。
